

Memorandum

To: Lower Rum River Water Management Organization
From: Barr Engineering Co. 
Date: April 12, 2021
Subject: Permit #2021-02: Northfork Meadows: Ramsey

We have received plans and a LRRWMO permit application received March 3, 2021 for Northfork Meadows a 33-acre, 84-lot single-family residential development located east of Puma Street N.W. and south of Alpine Drive in Ramsey.

The submittal was received on March 3rd past the date for consideration at the March 18th meeting. We have since had several discussions with the project agent regarding additional information and requested revisions to address LRRWMO's stormwater management requirements. E-mail correspondence dated April 3, 2021 was sent to the permit applicant and project agent outlining additional information required to comply with the LRRWMO's volume retention and low floor elevation criteria. A revised submittal was received on April 12th, reviewed with additional review comments discussed with the project agent. We are requesting this item be continued by the LRRWMO until a revised submittal is provided for review.
